**HOME OF LOW PRICES**  
**Boston Store**  
 J. STOLAROFF  
 316 & 18 E. OVERLAND ST

The world's choicest markets have contributed their proudest productions to this showing. Our Ready-to-Wear and Millinery Sections are illumined with the cleverest creations that have been modeled for this spring's service. It's a display thoroughly practical, the most comprehensive ever attempted.

## Our Millinery Salon

It is with a deep sense of pleasure that we announce our advance spring styles. That the season is going to be a glowing one has its prophecy in the magnificent creations now to be seen in authentic fashion centers. With the Boston Store the tendency has been to get together the daintiest and the most artistic for our patrons. To gather their best ideas as to what will be the leaders, especially those early styles.

Among many of the new shades are to be seen violet, wisteria, burnt rose, taupe, green and several others. This will give a faint peep at what is going to be an elaborate display later. One other shade that must be mentioned is the one called chickory. This is charming when embodied in straw and we state that many of the foremost styles in automobile pokes, corsets and the new turbans are chic and light in comparison with former styles. Come any opening day and see what will make you enthusiastic.

## PECOS TO HAVE ALFALFA MILL

Company Is Formed There With \$25,000 Capital. To Complete Mill June 1.

Pecos, Tex., March 2.—A company with \$25,000 paid up capital, has been formed at Pecos for the purpose of erecting and operating an alfalfa meal mill. P. W. Johnson, W. D. Cowan, E. W. Farwell, T. Y. Casey and T. J. Sisk, all of Pecos, are the incorporators, and application has been made for a charter.

The plant will be completed by June 1, this year, in time for the season's crop, and will have an annual capacity of 15,000 tons. The climatic conditions in the territory tributary to Pecos are such that the alfalfa from this section commands the highest market price, and the report to the company just organized, by the experts employed, is that the meal from this alfalfa should be the equal of any in the world. Because of the absence of dew or other precipitation during the curing season the alfalfa goes

into bales or is manufactured into meal in prime condition. T. J. Sisk, who will be the general manager for the company says that in addition to the plain alfalfa meal, there will be manufactured a mixed feed, by combining alfalfa meal and kaffir corn with the alfalfa.

The demand for this balanced ration is so great, and the price accordingly high, that the grower is allowed more for his product than he could realize as hay, and also permits of a profit to the meal processors.

## TWO MEN KILLED IN DOUGLAS PLANTS

Engineer Is Electrocuted. Repair Man Crushed to Death.

Douglas, Ariz., March 2.—Two accidental deaths occurred here when Walter Lockhart and Luther C. Day, employed with local companies, were killed almost instantly. Lockhart, who was but 22 years of age, was employed at the Douglas Improvement company's plant as electrical engineer, formed a contact with the high voltage dynamo of the power plant and was almost instantly killed by the 2200 volts of electricity which passed through his body.

Day met death at the Copper Queen smelter where he was working as converter repair man.
